STUDIO® PRINTS

NEW ADDITIONS

Raku

Reactive Texture Through Print

Studio Prints collections are a contemporary take on traditional studio pottery. Raku, a range in the Studio Prints collection, is inspired by the traditional glazing process known as Raku firing, which creates expressive and exciting results. Emulating an artisan glaze finish, Studio Prints Raku has all the durability and technical reassurance required for the hospitality environment.

Introducing a new teapot, mug and jug within Raku to complete the beverageware collection, available in Topaz Blue to complement all colourways in the range.

Las colecciones Studio Prints son una versión contemporánea de la cerámica tradicional. Raku, una gama de la colección Studio Prints está inspirada en el proceso de decoración tradicional. Fabricadas en el Reino Unido, Raku ofrece una textura reactiva que se logra mediante el innovador proceso de impresión de Churchill. La impresión se coloca directamente debajo del esmalte, creando una capa protectora sobre la decoración. Presentamos una nueva tetera, mug y jarra dentro de Raku para completar la colección de tazas, disponible en Topaz Blue para complementar todas las combinaciones de colores de la gama.

Prodotto in Inghilterra, la stampa di Raku si ottiene attraverso l'innovativo processo di stampa della Churchill. La stampa viene posizionata direttamente sotto smalto creando uno strato protettivo sopra il decoro. Ogni pezzo è unico dal momento che la stampa reattiva rende il colore originale in modo spontaneo e casuale. Imitando la finitura smaltata artigianale, Studio Prints Raku possiede tutta la resistenza e le garanzie richieste per l'hospitality. Presentazione di una nuova teiera, tazza e brocca all'interno di Raku per completare la collezione di tazzame, disponibile in Topaz Blue per completare tutte le colorazioni della gamma.

Die Studio Prints Kollektionen basieren auf der zeitlosen Kunst der traditionellen Studio Töpferei. Raku ist eine Studio Prints Kollektion. Sie ist inspiriert durch den traditionellen, gleichnamigen Brennprozess Raku. Die dadurch entstehende Glasur schafft einen ausdrucksstarken Auftritt für kulinarische Erlebnisse. Raku ist "Made in England" und entsteht durch ein innovatives Druckverfahren von Churchill. Das Muster befindet sich unterhalb der Glasur und wird dadurch optimal geschützt und verleiht somit die in der Gastronomie erforderliche Haltbarkeit und Beständigkeit. Eine neue Teekanne, ein Becher und eine Kanne aus Raku vervollständigen die Getränkekollektion. Sie sind in der Farbe Topaz Blue erhältlich und ergänzen alle Farbvarianten der Serie.

Fabriquée au Royaume-Uni cette nouvelle gamme est un exemple du procédé innovant d'impressions de Churchill. Le décor est appliqué directement sous email, ce qui crée une protection pour la décoration. Toutes les pièces sont uniques car les couleurs réactives provoquent un effet craquelé différent. Même si elle ressemble à une assiette artisanale, le modèle Raku, présente tous les caractéristiques de durabilité et résistance nécessaires. Présentation d'une nouvelle théière, d'une tasse et d'un pichet au sein de Raku pour compléter la collection cafétéria. Disponibles en Topaz Blue, elles s'associent à tous les coloris de la gamme Raku.

Our Environment

the steps to a more sustainable future

We give extensive consideration to the impact on the environment throughout our production processes and ensure that the best environmental option is always adopted.

FEATURES & BENEFITS - CERAMICS

FULLY
GLAZED BASE

 Although glazing the feet of our ceramics adds complexity it increases functional benefits to the customer. Foot glazing requires 'pin firing'. This prevents scratching to tables and plates when stacked.

 Aunque esmaltar una pieza en su totalidad añade complejidad, esto aumenta los beneficios funcionales para el cliente. El esmaltado en la base de cada pieza requiere de un "pin-firing". Esto evita que se rayen las mesas y platos cuando se apilan.

 Obwohl das Glasieren der FüÙe unseres Geschirres die Komplexität erhöht, erhöht es den funktionellen Nutzen für den Kunden. Für eine Fuß-Glasur ist das sogenannte "Pin-Firing" erforderlich. So wird das Zerkratzen von Tischen und Tellern beim Stapeln verhindert.

 Sebbene la smaltatura dei piedi della nostra ceramica aggiunge complessità, accresce i vantaggi funzionali per il cliente. La smaltatura dei piedi richiede una "cottura su punte". In questo modo, si evitano i graffi sui tavoli e sui piatti quando vengono impilati.

 Le procédé du talon émaillé est un réel avantage fonctionnel pour nos clients. Pour l'obtenir, l'assiette est laissée à sécher sur un trépied en bois. L'émail pulvérisé recouvre intégralement l'assiette sauf 3 petits points au dessous de l'assiette qui seront polis plus tard.

STACKABLE

 The technology used to form our products ensures consistency in size and weight allowing pieces to be stacked back of house using less space and reducing breakages.

 La tecnología utilizada para formar nuestros productos asegura la consistencia en tamaño y peso permitiendo que las piezas se apilen eficientemente usando menos espacio y reduciendo las roturas.

 Die Ränder werden mit einem Schwamm bearbeitet, um eine runde, glatte Oberfläche zu erzeugen, die weniger anfällig für Absplitterungen ist.

 La tecnologia impiegata per formare i nostri prodotti garantisce omogeneità di peso e dimensioni, affinché possano essere impilati negli spazi di servizio con un minore ingombro e meno rotture.

 Une technologie de pointe qui assure la régularité et une parfaite cohérence entre la taille, la forme et le poids du produit. Les espaces de stockage des professionnels sont optimisés.

DURABLE
AND VITRIFIED

 Breakages in ceramics are generally related to porosity or how much water a piece can absorb. Water absorption weakens the chemical structure affecting its durability over time. Through the process of vitrification, the particle structure of our ceramic body becomes strong, dense and watertight.

 Las roturas en la cerámica están generalmente relacionadas con la porosidad, o con la cantidad de agua que una pieza puede absorber. La absorción de agua debilita la estructura química afectando su durabilidad en el tiempo. A través del proceso de vitrificación, la estructura de partículas de nuestro cuerpo cerámico se vuelve fuerte, densa y hermética.

 Brüche in Keramik hängen im Allgemeinen mit der Porosität zusammen oder damit, wie viel Wasser ein Stück aufnehmen kann. Wasseraufnahme schwächt die chemische Struktur, was die Haltbarkeit im Laufe der Zeit beeinträchtigt. Die Partikelstruktur unseres Keramischen Scherben wird durch den Vitrifizierungs Prozess robust, dicht und wasserundurchlässig.

 Le rotture della ceramica dipendono in genere dalla porosità, cioè dalla quantità di acqua che un pezzo è in grado di assorbire. L'assorbimento di acqua indebolisce la struttura chimica, compromettendone la durata nel tempo. Mediante il processo di vetrificazione, la struttura delle particelle del nostro corpo ceramico diventa forte, denso e impermeabile.

 Les fissures ou casses de céramique sont généralement liées au taux de porosité. L'absorption d'eau affaiblit la structure chimique de la céramique, affectant sa résistance dans le temps. Grâce au processus de vitrification, la structure granulaire du corps céramique se compacte et se densifie.

SUPERIOR
GLAZE FINISH

 Our glaze is hard wearing and designed specifically for the hospitality environment. Sprayed glaze creates a smoother and more consistent finish.

 Nuestro esmalte es resistente y está diseñado específicamente para el entorno de la hostelería. El esmalte que se aplica con spray crea un acabado más suave y consistente.

 Unsere Glasur ist widerstandsfähig und speziell für das Gastgewerbe konzipiert. Die aufgesprühte Glasur erzeugt eine glattere und gleichmäßigere Oberfläche.

 Il nostro smalto è resistente e appositamente studiato per le strutture ricettive. La smaltatura a spruzzo crea una finitura più liscia e uniforme.

 Notre émail est conçu spécifiquement pour le secteur hôtelier. Le procédé d'émaillage par pulvérisation permet d'obtenir une finition plus lisse et homogène.

ECO GLAZE

 Our glazing system is carefully formulated to allow oversprayed glaze to be collected, go through a lengthy cleaning process and then be reused, minimising our impact on the environment.

 Nuestro sistema de esmaltado está cuidadosamente formulado para permitir que el esmalte pulverizado sobrante se recoja, pase por un largo proceso de limpieza y pueda luego ser reutilizado, minimizando nuestro impacto en el medio ambiente.

 Unser Glasursystem so gut konzipiert ist, dass wir überschüssig gesprühte Glasur auffangen und nach einem langwierigen Reinigungsprozess erneut verwenden können, um unseren Umwelteinfluss zu minimieren?

 Il nostro sistema di smaltatura è accuratamente formulato affinché lo smalto spruzzato in eccesso venga raccolto, subisca un lento processo di pulizia e possa quindi essere riutilizzato, riducendo al minimo il nostro impatto sull'ambiente.

 Notre système de pulvérisation nous permet de récupérer les excédents d'émail lors du process de nettoyage. En les intégrant à nouveau dans le process de fabrication, nous réduisons notre impact sur l'environnement.
