Suitable inserts made of glass and china (7 cm x 7 cm) are available on page 260.

"Bento Box"

"Bento Box" - flexible mobility

Serving guests at the pool, beach or on the terrace is often associated with longer walking distances for service staff. The "Bento Box" from Zieher has been designed especially for these requirements - all components are stackable. This way, they guarantee a space-saving storage and a comfortable, non-slip transport, even with several dishes at the same time.

Matt black melamine, modern design and subtle contrasts created by different surface structures, form the perfect setting for individual creations and popular classics such as burgers, club sandwiches or salads.

The box is divided into a main compartment for plates up to a diameter of 28 cm and a narrow side compartment for cutlery and napkin or miniatures made of glass and porcelain.

Optionally available inserts in the same design create additional space for side dishes, sauces or dips, when placed above the cutlery compartment. Up to four of these bowls can be placed in a bento box if required, and, with a correspondingly flat content of the main compartment, create a second level for even more flexibility.

The versatility of the individual components also becomes evident in the cover, which has decorative ventilation slots to dissipate steam generated by hot food. This lid can also be used as a tray, whose less finely textured inside has an anti-slip effect.

Box, insert bowl and lid are sold separately and can be combined as desired. This allows the restaurateur the adaption to his individual needs and helps to optimize additional purchases.
