Our Philosophy

Discover the greatness in simplicity

Design for People-ONE

Our world is rapidly changing and we realized how much impacts on surrounding from what we produced. We believe building ONE right product is much more meaningful than producing thousand mediocre pieces.

In TC 's design philosophy, people always be the key factor to consider. The product design should helps improving operational efficiency while saving human efforts, enhancing service quality while achieving cost controlling, being easy using while experiencing aesthetic pleasure.

That is why we insist to build our products to stand the test of time, good products are designed based on operational requirement, end-users' habit and the decorative style of outlets, this means they are practical, aesthetic and environmental friendly.

Our Mission

Experience the power of innovation through creating the connection with people

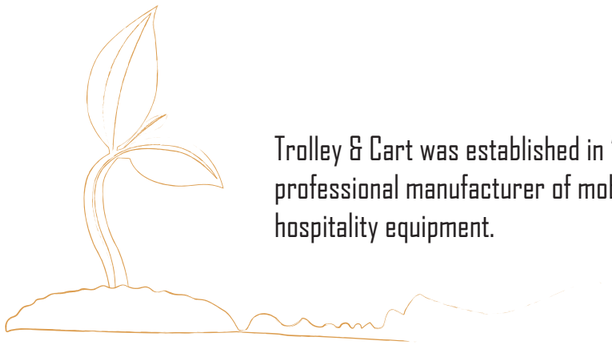
Product for Responsibility-ONE

We have been producing commercial trolley since 1995, all those years TC gained enough production experience and industry knowledge for hospitality market. With a global industry that is seeing monumental growth, the demand for products in an increasingly competitive market has soared. This trend pushed many manufacturers shifted towards low-cost production but TC is very well-known because we never compromise in quality. This reputation came with a big cost challenge as well, that's why we set R&D Dept. in 2018.

Then this R&D investment returned much more value from new material application, sustainable production process (no waste disposal, no air and water pollution) and leading products innovation than what we expected, also helped us to achieve the cost efficiency and eco-friendly.

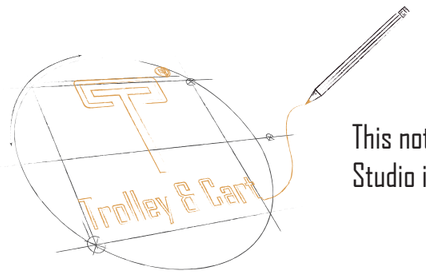
After years striving, the insistence of quality and long-life product brings us close partnership and loyalty customers.

OUR STORY

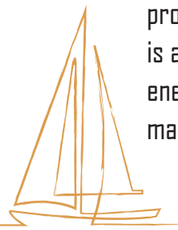


Trolley & Cart was established in 1995 as a professional manufacturer of mobile hospitality equipment.

Over the years, we recognized that there was a greater need for mobile equipment to not only be high quality but also be aesthetical, cost-effective, sustainable and multifunctional.



This notion drove us to set up TC Design Studio in 2017.



By overseeing the entire process from the initial design through to final production, we invest heavily in research and develop new solutions that is able to offer great value-sourcing sustainable materials, energy-efficient product ranges, space-saving design and many other innovation possibilities.

By partnering with international suppliers and distributors, Trolley and Cart is constantly looking for new and better ways forward. We adopt a consultative approach with our customers and collaborate with industry professionals in catering, hospitality and F&B to drive innovation forward and build for the future.

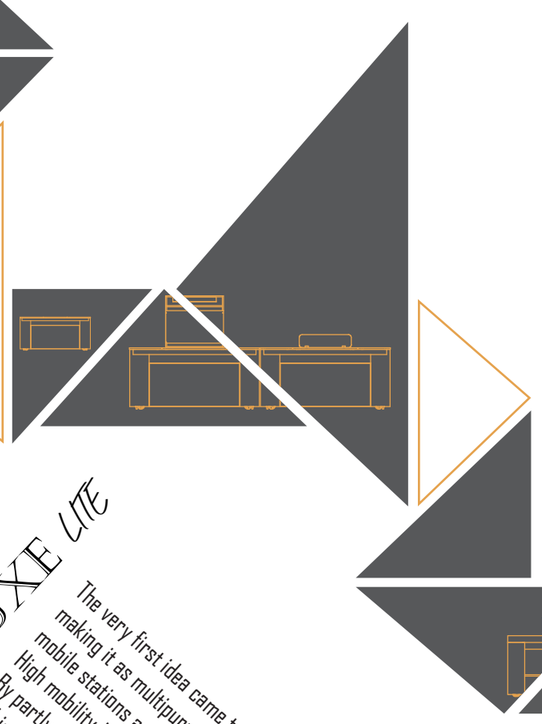
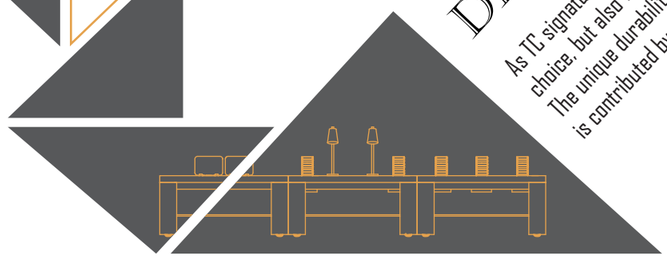
FLEX offers more possibilities in today's living cooking. Portability and convenience of FLEX are perfectly suited for high-overturn banqueting and large exhibitions.
With that, no limited by the venue and no longer requiring too much time to set up, FLEX is the game changer.



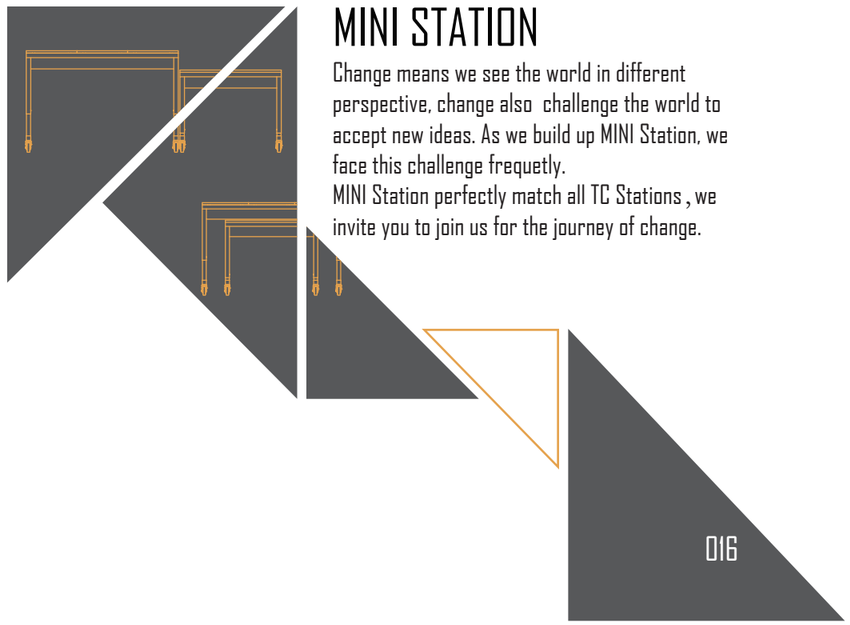
DELUXE *LITE*

The very first idea came to us when designing Deluxe Lite is making it as multipurpose as we can. We found out a lot of mobile stations are not easily maneuver.
High mobility built our very first design idea of Deluxe Lite. By partly using aluminum in this station body, Deluxe Lite achieved a good balance piont between stability and maneuverability. It perfectly present most features of Deluxe while keep its own personality.



DELUXE

As TC signature product, Deluxe is not only chef's first choice, but also the matrix for all TC buffet stations.
The unique durability and stable performance of Deluxe is contributed by the steel body and the swing design.



MINI STATION

Change means we see the world in different perspective, change also challenge the world to accept new ideas. As we build up MINI Station, we face this challenge frequetly.
MINI Station perfectly match all TC Stations , we invite you to join us for the journey of change.

MOBILE STATION COLLECTION

As an agitator, designer, and theorist, TC work fearlessly to explore the boundary between creativity and adaptability.

From kitchen to ballroom, live cooking to catering, we are inspired by the idea of providing mobile F&B service with food trucks and buffet stations.

After 5 years and thousands of testing, we present you our TC Mobile Station Collection-Deluxe, Deluxe Lite, FLEX and MINI Station.

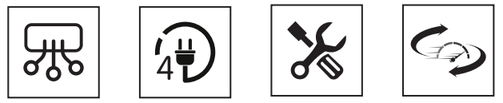
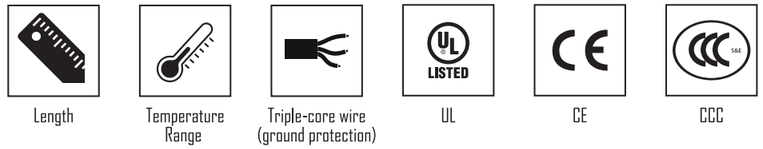
Overall Protection of Electrical Safety

Removable Power Bar



This bar is designed to eliminate all potential hazards in using high power cooking devices and minimizng maintenance and repair cost. Built-in 4 individual electrical supply sets include weatherproof and dust-tight 10A universal socket with overload circuit breaker and aviation connector plug in each set.

Removable 4 aviation connector plugs



1.5m /5' long, certified by UL/CE/CCC, screw-lock structure, Ø1.5-2.5mm triple-core wire, impact resistance, safe use in harsh environment (-40℃--75℃/-40oF--167oF). One side connect to the bar, another side connect to ELCB adopter.

ELCB adopter

10A/16A Earth-leakage circuit breaker are added extra protection against the risk of electric shock. It instantly cuts the power in the event of an earth connection leakage.

Color Selection

Color is the initial impression of each product. The visual texture largely determine our feeling of products. Sometimes aesthetic is under the light and reflection. By choosing different panel colors, textured finishes and different frames, you can give each mobile station its own character.

SERVICE TROLLEY

ONE SERVICE TROLLEY SYSTEM

Service Trolley is underrated. TC face the challenge by re-formulating trolley's role in F&B operation. This versatile trolley is not used only as a food and wine display but can be converted to many other usages such as a mini bar to food warmer. With our Module System-T, ONE trolley diversified into a multipurpose cart.

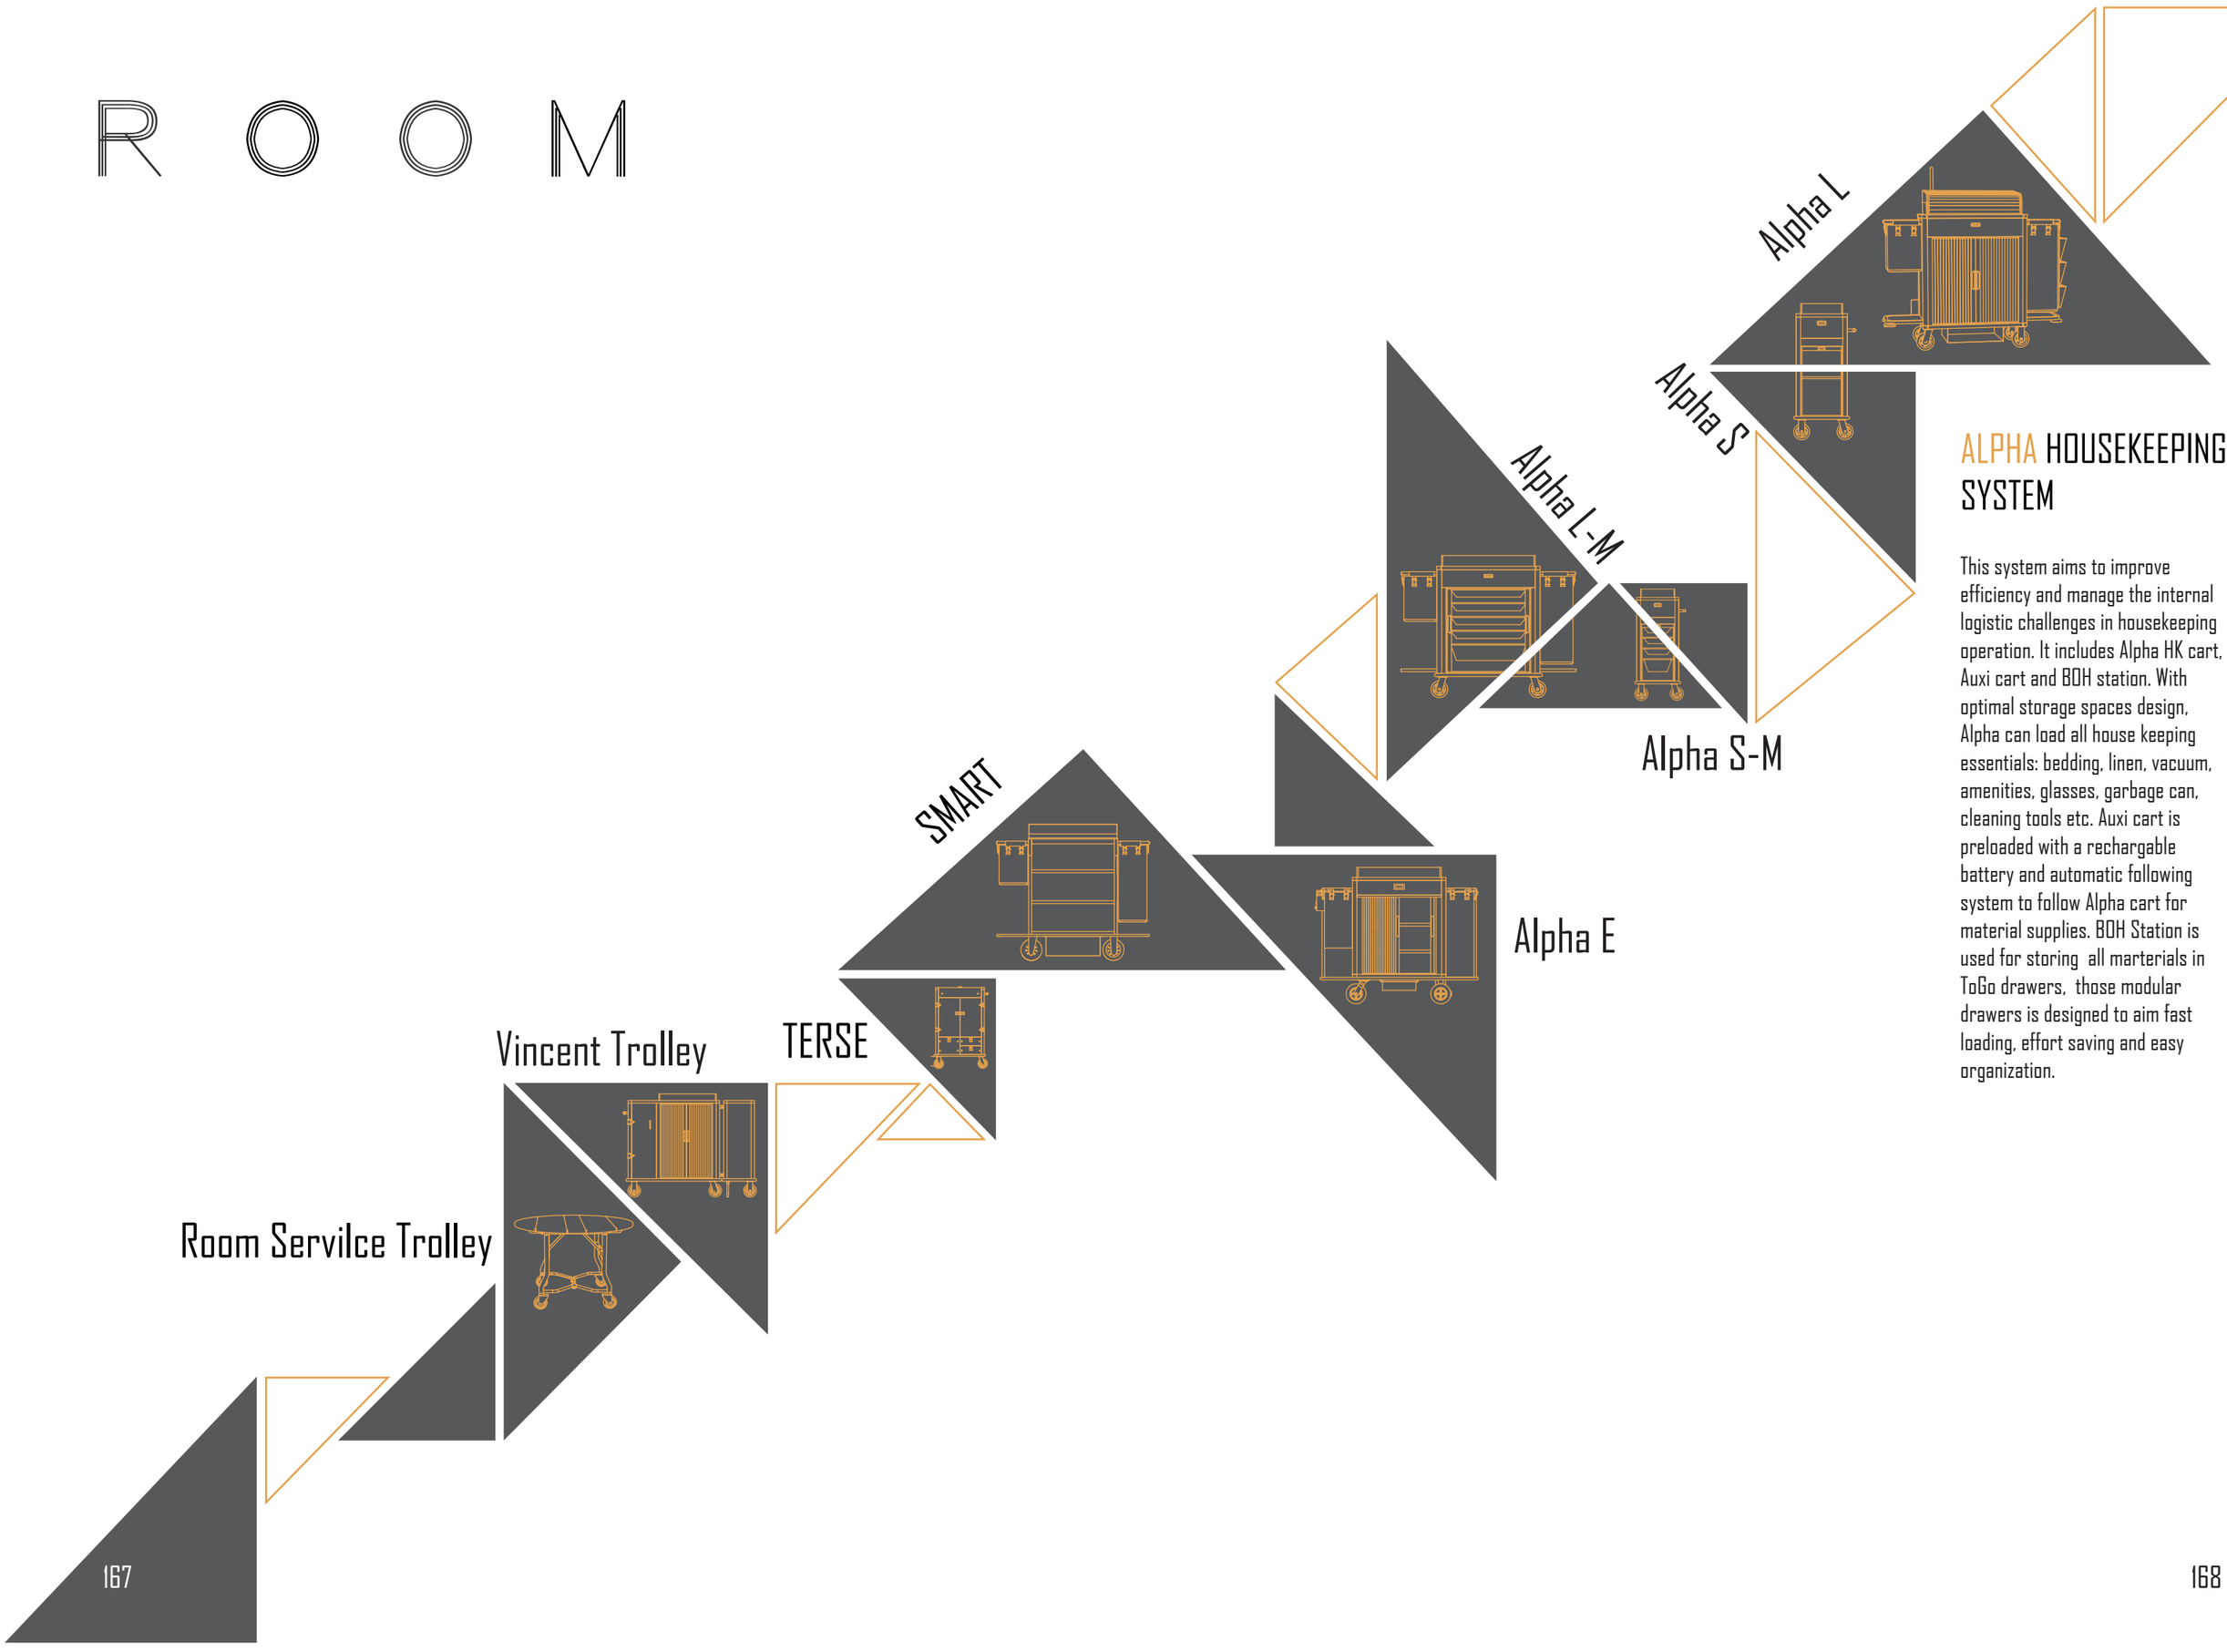
R O O M



ALPHA HOUSEKEEPING SYSTEM

This system aims to improve efficiency and manage the internal logistic challenges in housekeeping operation. It includes Alpha HK cart, Auxi cart and BOH station. With optimal storage spaces design, Alpha can load all house keeping essentials: bedding, linen, vacuum, amenities, glasses, garbage can, cleaning tools etc. Auxi cart is preloaded with a rechargable battery and automatic following system to follow Alpha cart for material supplies. BOH Station is used for storing all marterials in ToGo drawers, those modular drawers is designed to aim fast loading, effort saving and easy organization.

For maximum space using, we designed the special range of amenities compartments on the top of Alpha cart with a roll-up door.
Standard body with 3 shelves are perfect for clean linens and dirty linens go to one side of the removable waterproof linen bag. Another side is a smaller bag which can be used for collecting garbage, beneath space for vacuum or other cleaning equipment.
And last but not least a rack holder is installed at bottom of the cart to store glasses and cups.

Alpha - M Auxi

HTAMA01

Size:L870xW540xH1570mm
L34.25"×W21.26"×H61.81"

As a partner of Alpha, Auxi was designed with big loading capacity for linen, amenities, drinks etc. Usually loaded carts are heavy to push, but we empower the Auxi cart with a rechargeable battery, electric wheel with brakes and a automatic following system. Auxi follow Alpha without pushing, that drives logistic and operational efficiency up and save efforts. As a result, Auxi make housekeeping as easy as possible.
