

NY-craft General Catalog

Nakayoshi Shoji Co., Ltd.

RIVERET / agney* / taffeta - Big common point

1. Dishwasher Safe

These products that excluding some products can be washed using residential dishwashers.

* Dishwasher detergents containing bleaching or abrasive agents cannot be used.

2. The material prevents discolor on and staining

A six-layer coating that penetrates into the material prevents discoloration and staining by foods like wine and coffee. You can use these products every day with peace of mind.

3. Suppress germs : LOHAS COAT

LOHAS COAT is a coating technology developed in-house that suppresses e-coli and staphylococcus aureus thanks to a synergistic effect of the paint that contains natural green tea ingredients and phytoncide already a component of the bamboo itself.

* This coating is not guaranteed to control all bacteria or have permanent benefits.

Details are described later on in the catalog.

RIVERET / agney* / taffeta

These brand's products are produced by Nakayoshi Shoji Co., Ltd.

Nakayoshi Shoji.co.,ltd. Started its business as a wholesaler and trader of daily necessities, bamboo and wooden goods in 1988. It then started researching and manufacturing with natural materials to create various products as a manufacturer.

Our concept of manufacturing is not only about the skills of craftsmen or commitment to traditions. We believe that the philosophy of "manufacturing" is embedded in every process related to our products- it's not confined to the framework of a manufacturer. The process varies from cultivating bamboo for our material to product development, sales, brand building, and follow-up services.

We strike for in-house production if at all possible, we aim to produce safe, high-quality products/ services at reasonable prices.

We will continue to be devoted to better ourselves and pick up new challenges so as to attain our customers' recognition as a top-class company.

Nakayoshi Shoji Co., Ltd.

RIVERET

Sophisticated bamboo tableware

This brand boasts a wide variety of wooden liquor glasses and mugs.

The refined design vividly stands out the essential beauty of the natural material.

Perfect as gifts for weddings, Father's Day, Mother's Day, and employment or retirement celebrations.

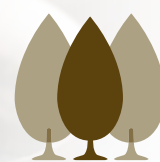

agney*

The dishes made of bamboo and wood for babys and kids.

The best gift for celebrating a newborn, birthdays, and kindergarten entrance/graduation.

Our tableware supports kids' healthy growth with the tender touch of natural material.

Suitable for multiple uses from baby's first solid meal to everyday use of kids.

taffeta

taffeta

Natural items as an integral part of your daily life

The simple design fits in various scenes and lifestyles.

This brand is offered at a relatively affordable price and in a wide range of sizes. And, our wooden product is easy to handle.

RIVERET's Features

Maintains beer's head

We developed the inward curving angle and finish of the surface specifically with beer in mind. The curve is designed to maintain and accommodate the beer's head, or foam, which functions as a lid. The longer the foam lasts, the longer it prevents the beer from oxidation. Because of that, the taste will stay nicely until the last sip.

A delicate feel

Compared to glass or pottery, bamboo is affected less by temperature changes and provides a gentle feel. Our delicate machining technology allows us to prepare material as thin as 2mm thick, which not only makes it easy to drink but also enhances the original flavor of the drink.

Outdoor scene

One of the best parts of outdoor recreation is finding what becomes your favorite gear. RIVERET's items are highly regarded as outdoor products for their light weight, practicality, and staining-proof qualities. RIVERET's items are highly regarded as outdoor products for their light weight, practicality, and staining-proof qualities.

Bridal Gifts

Since RIVERET's tableware is made from bamboo, a material that is regarded as a lucky charm, many orders are placed as wedding gifts and favors.

We can personalize most items with a personal name or names, even on large orders. We also offer wrapping and gift bag services.

- There are some items we cannot personalize with names.
- Delivery time varies depending on the number of items ordered and whether you need them personalized. Please consult with us before placing your order.

RIVERET tableware products

Ingredients Moso bamboo (China)

Surface Urethane coating (These coating materials are made in Japan.)

Processing Lumbering / Basic shaping : Nanchang factory in China

Final shaping / Coating / Laser engraving / Polishing : Saitama factory in Japan

Material Features

Bamboo

The texture is smooth and sleek, with a straight grain. Bamboo is an innovative natural resource that can be used repeatedly and efficiently with minimal land use.

Rubberwood

The texture is slightly shiny, smooth, and rustic. It is characterized by a solid grain and small dents. The more it is used, the more lustrous the material becomes.

Beech

The texture is smooth and slick, and the color is slightly reddish compared to rubberwood and hard maple. The grain is less noticeable and the hardness is a characteristic of this wood, which is often used for furniture such as chairs and desks.

In line with the SDGs philosophy, agney* carefully selects "wood (tree species)" with low environmental impact" as raw materials according to the situation.

Tablewares for weaning ceremony

Urethane coating (These coating materials are made in Japan.)

Processing

Lumbering / Basic shaping : Nanchang factory in China

Final shaping / Coating / Laser engraving / Polishing : Saitama factory in Japan

* All processes are manufactured in our factory.

agney* cloth products

Ingredients 100 % Organic cotton (India)

Sewing Ehime and Saitama in Japan

the Original Gift Box

agney* always comes within a box in a gentle and fresh blue color.

We regard the excitement and thrill of opening the box are crucial indeed.

Since most of the purchases of agney* is for gifting, we provide a standard gift box to match with the size of the products.

(Some items are excluded)

The **three** essential technology point of agney*

1 **LOHAS COAT** "6 layer coating"

LOHAS COAT is a proprietary coating technology that has been proven to inhibit *Escherichia coli* and *Staphylococcus aureus* through the synergistic effects of a coating containing natural green tea ingredients and phytoncide, which is inherent in bamboo. *Not all bacteria can be inhibited or guaranteed to be permanently effective.

What is the 6-layer coating?

The coating is carefully applied in six layers using independently developed coating technology. The coating permeates not only the surface but also the interior of the bamboo, preventing oily, soupy or dark-coloured dishes from seeping through.

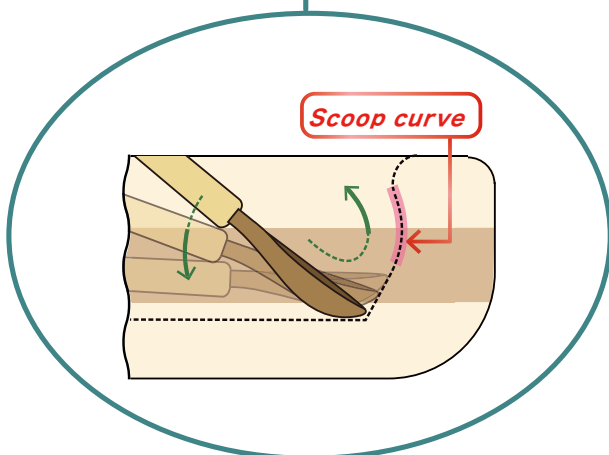

2 Technology for utilising bamboo joints.

Bamboo, with its high strength, is difficult to process, especially the "joints", which are even more difficult to process as their strength is different from other parts. We have conducted extensive research and developed its own polishing process, and has succeeded in utilising bamboo joints, which until now have not been utilised.

3 Easy scoop up with **Scoop curve**.

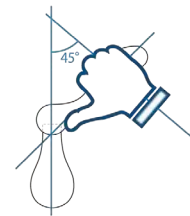

The Mogu Mogu curve is the inward curve present around the entire edge of the plate. You can move your spoon along the Mogu Mogu curve which makes it easier to scoop food from the plate!

Fun form: Plate Family

Straight to the mouth, at the perfect angle.

Tableware for growing children: First Meal Ceremony

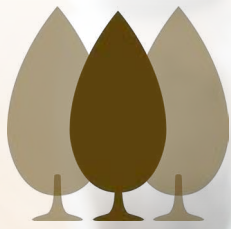

agney*'s First Meal Ceremony tableware set will accompany your child's growth with you. You can use the bowls for both baby food and everyday use. The flat plates are perfect for serving side dishes! When your child is a little older, the chopsticks will come in handy. Our natural tableware supports your child through all the important stages of their relationship with food.

The way it breaks matters

Since our tableware is made of wood, chewing on it can leave scratches and damage it. However, if children bite down hard on materials like stainless steel, it can chip their teeth or damage their jaw, a problem softer materials do not have. That is why we think it is an important feature for a product to break when a greater force than necessary is applied.

taffeta

Material Features

Rubberwood

The texture is slightly shiny, smooth, and rustic. It is characterized by a solid grain and small dents. The more it is used, the more lustrous the material becomes.

Hard maple

The texture is fine, smooth, and smooth to the touch. The grain of the wood is gentle, and its milky white surface with a subdued luster is sometimes referred to as "the pearl of wood." The more the wood is used, the more it changes its color to a candy-like tint.

Beech

The texture is smooth and slick, and the color is slightly reddish compared to rubberwood and hard maple. The grain is less noticeable and the hardness is a characteristic of this wood, which is often used for furniture such as chairs and desks.

In line with the SDGs philosophy, taffeta carefully selects "wood (tree species) with low environmental impact" as raw materials according to the situation.

taffeta's features

All Hard maple

Producing gentle sounds

Sound is also an important aspect of dining.

The sound of tableware hitting each other like when rolling up pasta or scooping soup with a spoon, can all disturb the atmosphere of a dining scene.

Soft, wooden tableware produces much softer sounds than glass or ceramic.

Beech

It's wood, but also thin

We are proud of the thinness of our products.

Many wooden products are thick but taffeta products are characterized by their thinness, which provides a beautiful appearance.

In addition to the wood processing technology we use to achieve the perfect thinness, we also apply our proprietary coating technology called "LOHAS Coat" to prevent stains and leaks.

You can use our tableware without worry for all sorts of things, including soup and oil.

Cutlery's form

When eating, the tip of the fork determines the comfortability.

We are proud of our craftsmen's skills that allow us to achieve thinness and slenderness in wood while maintaining craft quality that persists even into stable mass production.

We dedicated ourselves to achieving the perfect balance between appealing visuals and the comfortability of use. These products can fit naturally into many scenes of your daily life.

Wooden material is friendly to everyone

Wooden tableware does not get excessively cold or hot like glass or ceramic, and easily maintains a stable temperature.

If you drop or break it, there is no need to worry about sharp pieces flying off everywhere and injuring yourself.

taffeta tableware has a gentle atmosphere. Everyone, from children to the elderly, can use them with peace of mind.

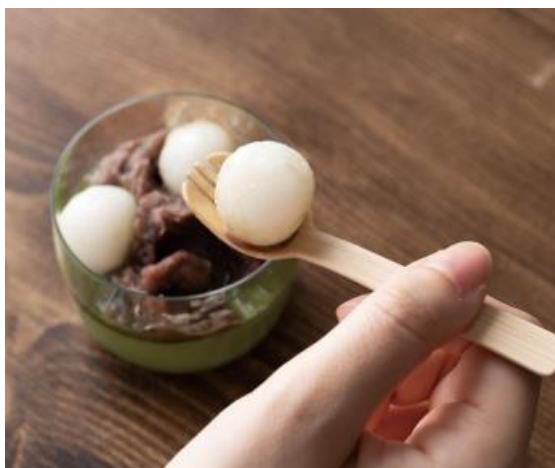

Eco-Friendly Disposable series

Disposable cutlery made of natural materials

Our Disposable tableware series are made of natural material. Especially recommend to take-out foods, food delivery services, street food merchants.

This disposable series is made of "Moso bamboo" that is replacing plastic-based materials for tableware.

Thin And Light

The feature is thin and light design to carry anywhere you want. Moreover, the material of Moso bamboo keeps usable strength and made it possible to have a thin shape.

For any cuisine in a restaurant

As an accent to course meals,
natural tableware is helpful to
assist the luxury atmosphere.

RIVERET

The process of your original logo manufacturing

Specifications

1. Logo position

The place where you can add your logo is specified by agney, RIVERET or taffeta and it depends on the item. You will be informed about the position when you decide your item.

Some items are not able to add a logo, and some items are only available to add a logo at one place.

2. Size

The maximum size of the logo depends on the item. Please confirm with our member.

For example :

Maximum vertical 30 x width 35mm is maximum.

3. Data

Providing Illustrator data (.ai) is necessary. The data should be gray scale (K:100%).

It may not be possible to express lines or dots if those are thin. (Minimum : 0.8mm)

The available items for the logo are only the items already launched. Please note that all of the items have the agney, RIVERET or taffeta logo.

Our products are made by natural resources.

There may be a difference in color depending on the material.

Original box option

We accept your original sticker to put on our gift box.

*ONLY RIVERET

Timeline

*This depends on your order and stock situation.

STEP. 1

Send inquiry

Please include item name, item number (AG-XX, RV-XX or TF-XX), quantity, deadline.

STEP. 2

Estimation

We will inform you about the stock situation and details within 5 business days.

STEP. 3

Draft data

Send Illustrator data (.ai) and the data should be gray scale (K:100%). It may not be possible to express lines or dots if those are thin. (Minimum : 0.8mm)

STEP. 4

Confirm sample image

RIVERET offers you to confirm the image of the sample. If you would like to see the sample product in practice, we will make an quotation for crafting the sample.

STEP. 5

Order

After confirming the sample, please send the purchase order. As soon as we receive it, we start crafting.

STEP. 6

Delivery term

Your items will be shipped from our factory in 1 month or 2 months. This depends on your order and stock situation.

Please feel free to contact us to get more details.

Every single product of ours is a craftsmanship creation

The products of all our brands are manufactured in our factory in Koshigaya City, Saitama Prefecture, and delivered to our customers. We do shape fixing, laser processing, and coating by ourselves in our streamlined production process.

Coloring Test

Coloring & stain experiment with dark-colored food and beverages left for 24 hours and then washed by hand

The uniquely developed "LOHAS COAT" has passed a 24-hour coloring & stain test without any problem. Even with red wine, coffee, dark-colored dishes, and oily food, no color migration or staining occurs.

LOHAS COAT is a coating technology developed in-house that suppresses e-coli and staphylococcus aureus thanks to a synergistic effect of the paint that contains natural green tea ingredients and phytoncide already a component of the bamboo itself. All RIVERET tableware utilizes this new LOHAS COAT technology, allowing us to manufacture safer and more reliable natural dishware.

* This coating is not guaranteed to control all bacteria or have permanent benefits.

Safety Product analysis tests conducted by Japan Food Research Laboratories

ITEM	DETECTION LIMIT	RESULT	METHOD

Imazalil (antifungal agent)	0.2µg/ml	Not detected	Chromatograph mass spectrometry

People show a great deal of interest in food safety since the past, so very naturally a question of tableware safety has also arisen as it has direct contact with foods.

Since it is invisible, we put a high value on confirming and visualizing the safety of our products. We have subjected the products from our brands to a number of quality tests conducted by an external organization.

We hope that the reliability, along with the design and functionality, will become your reason to choose our tableware. And that it will accompany your everyday life for many years to come.

Features of our products

You can use house dishwasher.

Normally use a soft sponge and neutral detergent to wash. You can also use house dishwasher.

* Detergent containing bleach or abrasive is prohibited.

6 Layer Coating

We have developed a penetrating 6 layer coating that will not fall off and sauce, oil, wine will not soak into the product.

We cultivate Bamboo by ourselves

Bamboo is one of most eco-friendly material in the world. It only needs 3 to 5 years to grow up/ and it also does not need any planting work Bamboo is twice as strong as cedar and cypress, and also contains many antibacterial elements. Thinking about the future of our children, we thought this material definitely could be one way to solve environment problem.

Bamboo forest owned by Nakayoshi Shoji Co., Ltd.

Prohibitions

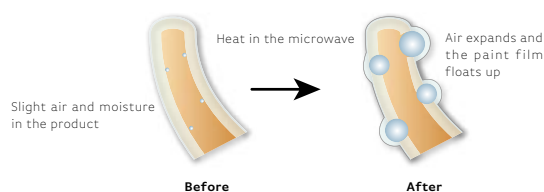

- ◆ Do not use this product in a freezer, microwave, oven, etc.
- ◆ Do not brush this product with a scrubbing brush or abrasive agent, etc.
- ◆ Do not disinfect this product through the use of bleaching agents, boiling, or chemicals.

If you put in microwave ...

The high temperature of the microwave expands the air and moisture inside the material that might push the coating off the surface.

Yet, it means the coating is attached firmly to the surface with no space in between. It prevents water or oil from being absorbed into the material.

agney* RIVERET taffeta Q&A

Can we put in microwave ?

All of the products are not designed for use in microwave oven. It may cause coating stripping, deformation, discoloration and firing.

How about the maintenance of tablewares.

Normally use a soft sponge and neutral detergent to wash. You can also use house dishwasher. (*Some items are excluded.)
Detergent containing bleach or abrasive is prohibited.

Can tablewares dip in water for a long time?

After using the tablewares, please wash them as soon as possible and keep them in a shady place. Do not dip in bleached water.

How about oil or sauce, will it soak into the plate?

We have developed a penetrating 6 layer coating that will not fall off and sauce, oil, wine will not soak into the product.

Will those tableware deform or discolor after using for a while?

We control our products from raw materials to final finishing to prevent deformation, discoloration under common use.

How about painting material, does it smell?

Our clear coating material uses urethane and it passes various kinds of quality test in Japan, like safety standards of Japanese Food Sanitation Act. If you can feel the urethane smell at the start of using, wash in 70 degrees water several times to get rid of the urethane smell.

Can you repair a dish when it is broken?

For safety assurance, we are not able to repair dishes because once it is broken, the broken piece will easy break again at same place.

Where do you make your products, where does the raw material come from?

After long research and development on the bamboo to use, we have bought a bamboo mountain and established 100% owned factory in the Jiangxi province in China. We conduct lumbering and basic shaping there, then we do final shaping, coating, laser engraving, and polishing in Saitama prefecture in Japan. We produce our tablewares from raw material to finishing ourselves to assure the best quality. Everything is made to guarantee quality.

Why do you use bamboo for making tableware?

Bamboo is one of most eco-friendly material in the world. It only needs 3 to 5 years to grow up/ and it also does not need any planting work. Bamboo is twice as strong as cedar and cypress, and also contains many antibacterial elements. Thinking about the future of our children, we thought this material definitely could be one way to solve environment problem.
