How Does the Fit Perfect™ System Work?

Adapter Bars

These patent-pending bars securely lock Fit Perfect™ pans into the majority of cold wells.

You'll need adapter bars to build your layout's main support system

Gap Bars

Because not all wells are the same length, you may need gap bars to fill any spaces in your layout.

Wider than adapter bars, gap bars help seal wells to prevent cold air from escaping.

Set Up Your Adapter Bars

Once you know your layout, set your adapter bars into your well widthwise, allowing enough space in between to match the width of your food pans.

Note: Fit Perfect™ works with the majority of industry cold wells. For wells with interior width range of 19.75" to 20", use CIHSPC21-WW adapter bar. For wells with interior width range of 11.88" to 12", use CIHADP12-WW. Contact us for wells with rounded corners.

Set Your Food Pans in Place

Place the lip of the Fit Perfect™ food pan over the ridge on the adapter bars to lock food pans in place.

 **PRO TIP** Pre-chill empty Bugambilia® resin-coated aluminum products in your walk-in when not in use to maintain food's freshness and reduce waste.

Mind the Gaps

If a layout leaves any uncovered spaces, just fill them in with the gap bar to keep cold air from escaping and complete the seamless look.

Note: Not all standard wells are the same length. Knowing the overall length of your well will help to determine what size gap bar you will need. Gap bars are available in 1", 1.5", 2", 2.5", and 3" widths
